Insights & Recommendations

Company Overview

Shield Insurance is a customer-focused insurance provider with operations in major Indian cities including Mumbai, Chennai, Delhi NCR, Hyderabad, and Indore. The company delivers a wide range of policy solutions for different age groups while prioritizing accessibility, agent support, and digital expansion through online platforms.

Problem Statement

Shield Insurance currently lacks a consolidated and interactive view to effectively track customer growth, revenue performance, and policy trends. There is also limited visibility into how customer behavior varies across age groups, cities, sales channels, and policy types, making it difficult for stakeholders to identify growth opportunities, evaluate channel performance, and understand demographic impacts on revenue and settlements.

Objective of the Analysis

- Monitor revenue and customer growth
- Identify high-performing cities
- Evaluate sales channel effectiveness
- Analyze customer behavior across age groups
- Enable data-driven strategic decisions

Data Overview

The data set contains data from Nov 2022 to Apr 2023

Shield Insurance has a presence in 5 metro cities, Mumbai, Chennai, Delhi, Hyderabad, and Indore

Sales Mode: Offline-Agent, Offline-Direct, Online-App, Online-Website

Age Group:
18-24, 25-30, 31-40, 41-50, 51-65, 65+

General Insights

- Peak Month Performance: March 2023– Revenue: ₹264M & Customers: 7.08K
- Worst Month Performance: November 2022– Revenue: ₹132M & Customers: 3787
- Delhi NCR: Highest revenue ₹401.57M & Highest customers 11K
- Indore: Lowest revenue ₹81.35M & Lowest customers 2.1K
- Delhi NCR and Mumbai together contribute nearly 65% of the total revenue

Sales Mode Insights

- **Offline Agent**: Dominates Sales Revenue ₹551M (55.67%) & Customers 14,873 (55.41%)
- **Online Website**: Weakest Revenue ₹125M (12.6%) & Customers 3,410 (12.7%)
- **Online sales** exhibited a notable **growth** starting from **February 2023**
- **4 policies** cross >**100M** revenue: **POL2005HEL, POL1048HEL, POL6093HEL & POL9221HEL**
- Policy Performance:
  - **POL2005HEL :** Highest revenue ₹324M, low customers 1,968
  - **POL4321HEL :** Highest customers 4,434, lowest revenue ₹25M (Popular Policy)

Age Group Insights

- 31-40 is the strongest: Highest revenue ₹284.3M & Highest customers 9.87K
- 65+ group generates high revenue with fewer customers, possibly health or retirement plans.
- The Offline-Agent channel performs best across all segments, with the 31–40 group generating 155M in revenue.
- Settlement rates increase with age, rising from 37.51% (18–24) to 74.33% (65+)
- Youth segments (18-24 and 25-30) contribute low revenue today, but represent long- term lifetime value potential.

Recommendations

- Focus on core segments (31–40 & 50+) to maximize revenue, customer retention, and settlement reliability.
- Improve underperforming segments (Under-30 and Tier-2 cities like Indore) to unlock new growth opportunities.
- Strengthen the Offline Agent channel while enhancing the Online Website to boost digital adoption.
- Optimize the product portfolio by expanding POL2005HEL reach and improving the revenue performance of POL4321HEL.
- Replicate Delhi NCR's successful sales strategy in other high-potential or underperforming cities.
